

## Proposed outcomes:

### Clients

- Be better informed of service available at the first point of contact with PHCN;
- Access to services beyond the first point of contact will be improved through increased and more complex referrals

- More opportunities to address their health needs at the preventative stage
- Timely referral will provide better outcomes for clients
- Through networking, case conferencing and care plan clients will receive a comprehensive health care
- Be able to participate in making decision for their health care

### Health professionals

- Be aware of services available and clients' needs
- Increase the use of case conferencing and care plan; social network, and access to information
- Increase the number and range of referrals from and to GPs within the health and other services
